-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

1. Claims 1, 4, 7 and 19 are objected to because of the following informalities: In claims 1, 4, 7 and 19 c), "maltitol" is misspelled. Appropriate correction is required.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 12 is indefinite since it is not clear how the flavor can be added between application of coating syrup and nothing, when "no dusting mix" is applied and what is intended by "just before and just after". Corrections are required without new matter.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cherukuri et al (4,317,838) or Cherukuri et al (4,238,510). Both Cherukuri et al patents disclose coating a chewing gum core by applying thereto a plurality of alternating layers of coating syrup and dusting mix in at least 12 separate coating operations, wherein the coating syrup includes 30-70% sorbitol and/or maltitol, 5% gum arabic, a high-intensity sweetener and a flavor and wherein the dusting mix includes 40-90% sorbitol and/or maltitol, up to 20% calcium carbonate filler and a flavor. Finding the optimum amount of

Art Unit: 1761

filler (calcium carbonate) in the dusting mix and to be applied to the gum core would require nothing more than routine experimentation by one reasonably skilled in this art. It is totally expected that increasing the amount of filler will reduce the cost of the coating since filler is less expensive than sweetener.
